SUMMARY

- Data Analyst with 1.5+ years of experience turning raw data into actionable business insights. Expert in **SQL**, **Python**, and **Advanced Excel** with a proven track record of building dashboards and automated reports for cross-functional teams. Master's in Data Science with strong foundation in statistics and machine learning. Passionate about driving business growth through customer-centric data analysis in fast-paced e-commerce environments.

EDUCATION

INSTITUTE OF MATHEMATICS & APPLICATIONS

| MASTER OF DATA SCIENCE | SEPT 22 – MAY 24

- **Coursework:** NLP, Machine Learning, Deep Learning, Analysis, Linear Algebra, Statistics & Probability.

VEER BAHADUR SINGH PURVANCHAL UNIVERSITY

| BACHELOR OF MATHEMATICS | JUL 18 – AUG 21

GRADE: FIRST DIVISION

- **Coursework:** Introduction to Probability, Real Analysis, Linear Algebra, Introduction to Statistics, Discrete Mathematics, Abstract Algebra, Economics, , Design and Analysis of Algorithms.

WORK EXPERIENCE

COGNIZANT | DATA INSIGHTS SPECIALIST

Gurgaon | Oct 2024 - Present

- As a Data Insights Specialist supporting the **Google xWS Onboarding & Vendor Management Project**, serve as the primary analytics partner for cross-functional stakeholders, bridging the gap between raw operational data and high-impact business decisions.
- Own the end-to-end development and maintenance of **10+ critical dashboards** in **PLX** and **Looker**, acting as the key liaison between Cognizant BI teams and Google's Analytics Leadership to ensure KPIs align with strategic objectives.
- Tracked, analyzed, and streamlined the registration process for **2,000+ suppliers** on the FG platform, delivering insights that reduced drop-offs and improved onboarding conversion rates.
- Conducted deep-dive analyses into **Work Order Cancellations**, identifying root causes and providing actionable recommendations to leadership—resulting in improved process efficiency.
- Ensure **100% accuracy** in all datasets and reports delivered to team leads, proactively validating data quality to support reliable, data-driven decision-making.
- Work closely with operations, vendor management, and analytics teams to align data solutions with business goals and drive continuous improvement.

IIIT BHUBANESWAR | MACHINE LEARNING INTERN

Bhubaneswar, IN | AUG 2023 - NOV 2023

- Developed a **Fake News Detection Model** Using Deep Learning.
- Used a **Kaggle** dataset with Real and Fake News articles, applying **Python** and **NLP** libraries for **Data Preprocessing**.
- Trained various **Machine Learning** techniques including **Naive Bayes**, **Random Forest**, and **Neural Network**, achieving **99%** accuracy in classifying news articles as real or fake.

PROJECTS

GAME OF THRONES DASHBOARD USING TABLEAU

TABLEAU, MS-EXCEL, DATA CLEANING & VISUALIZATION

Built a comprehensive **Tableau** dashboard, sourcing data from **Kaggle**, cleaning it in **Excel**, and visualizing episode details, totals, descriptions, and IMDb ratings for user exploration.

SQL: DATA CLEANING ON SWIGGY DATASET

SQL, DATA CLEANING, EDA

Used **SQL** to remove null values, organize menu categories into main and sub-categories, add a review column derived from ratings, and build a budget-type column by combining cost data from two sources — preparing the dataset for **Exploratory Data Analysis (EDA)**.

PNEUMONIA DETECTION AND CLASSIFICATION

PYTHON, DEEP LEARNING, CNN

Built a **CNN-based system** for diagnosing pneumonia from chest X-ray images, achieving **92%** accuracy with a simplified 6-layer model that outperformed existing complex models, using **image augmentation** to improve performance.

TECHNICAL SKILLS

DATA ANALYSIS & VISUALIZATION

- SQL (Google BigQuery), Python (Pandas, NumPy), MS Excel (Advanced), Tableau, Looker Studio, PLX Studio, Google Sheets, Statistical Analysis, Data Cleaning, Report Automation, Dashboarding.

MACHINE LEARNING

- Linear, Logistic and Poisson Regression, Classification Algorithms, K-Nearest Neighbours, Decision Trees, Random Forest, Support Vector Machines, K-Means Clustering, Multi-Layer Perceptron, CNNs, RNNs, LSTMs, Autoencoders, Siamese Networks, optimizers, loss and activation functions in Python using TensorFlow, Hyperparameter Tuning, Model Evaluation and Tuning.

STATISTICS

- Probability Distributions, Transformations of Random Quantities, Stochastic Processes, Markov Chains, point and interval estimation, Testing Hypothesis, ANOVA, Linear model, Linear Regression, Statistical Inference, MLE estimations, Effects Modelling, Random and Mixed Effects, Log-linear Models, Poisson Models.

PACKAGES

- Numpy, Scipy, Matplotlib, Seaborn, Pandas, Sci-Kit Learn, spaCy, OpenCV, NLTK, Keras, TensorFlow, PyTorch, transformers(Hugging Face), Weights and Biases.

NLP

- Vector Space Model, Edit Distances, POS Tagging, Named Entity Recognition, Autocorrect, N-Gram Language Model, Word Embeddings using CBOW, RNN Language Models, ELMO, BERT, GloVe, T5.

POSITIONS OF RESPONSIBILITY

VOLUNTEER | INSTITUTE OF MATHEMATICS AND APPLICATIONS

Bhubaneswar | Jan 2023

- At the International Conference on 'Mathematical Analysis & Applications' and 50th Annual Conference of Odisha Mathematical Society at Institute of Mathematics and Applications.
